

Ignition Coil

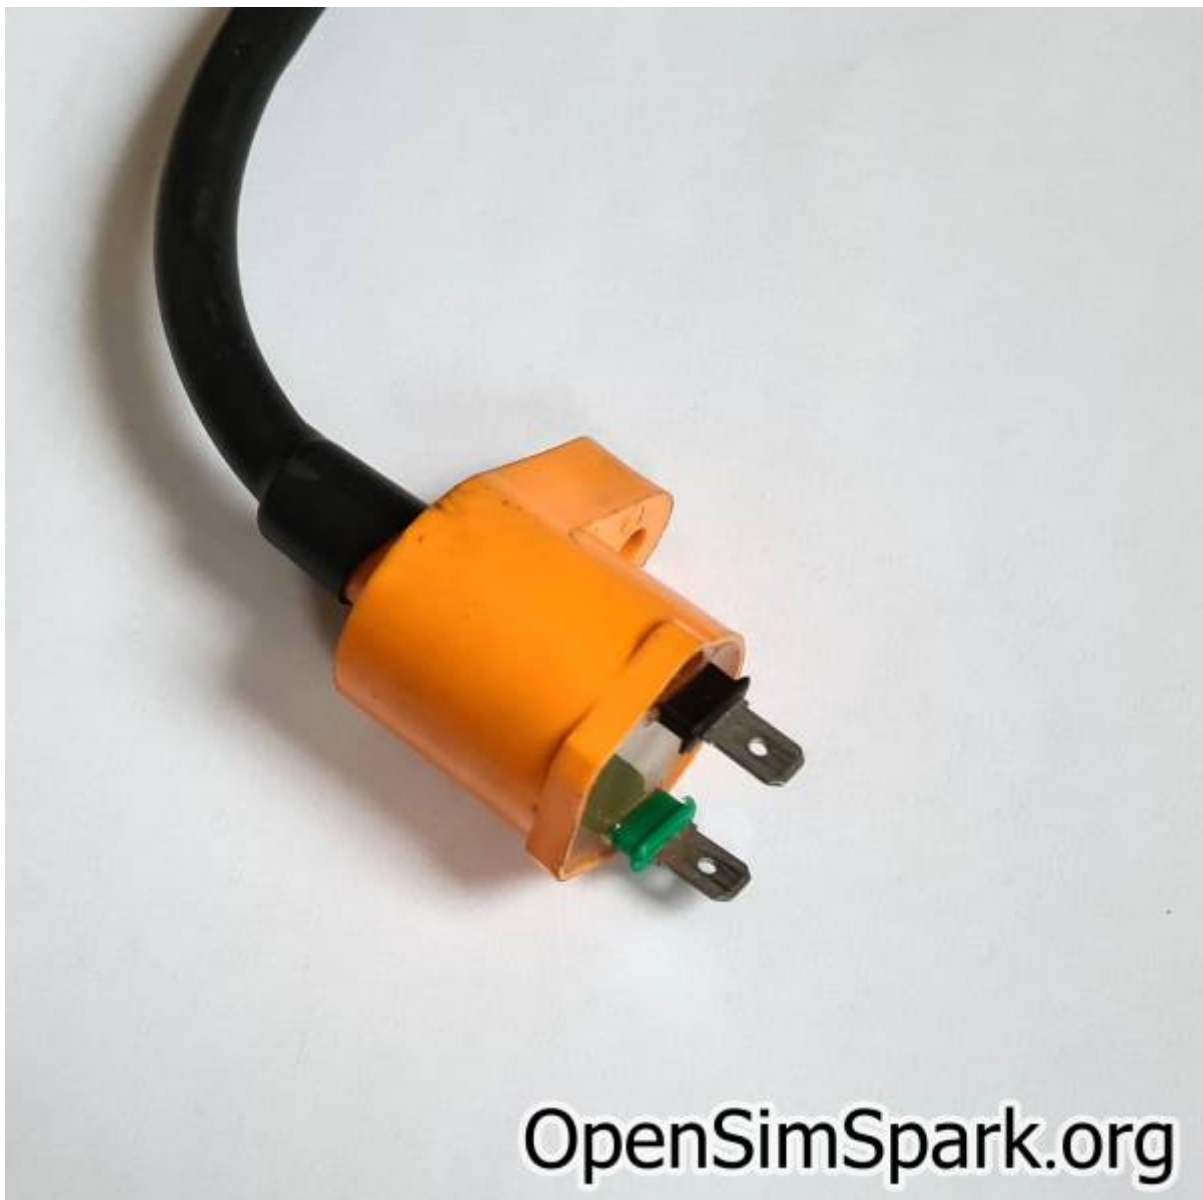

To get comparable results it is recommended to use some of the tested ignition coils.

Naraku

Good experience with long durability was made with „Naraku Racing“ ignition coil. It costs around 15 € / 20 \$.

Measured values:

- Primary coil (green to black connector): $R = 0,4 \text{ Ohm}$ $L = 0,033 \text{ mH}$
- Secondary coil (ignition cable to black connector): $R = 3,3 \text{ kOhm}$ $L = 2,0 \text{ H}$
