

# Ignition Coil

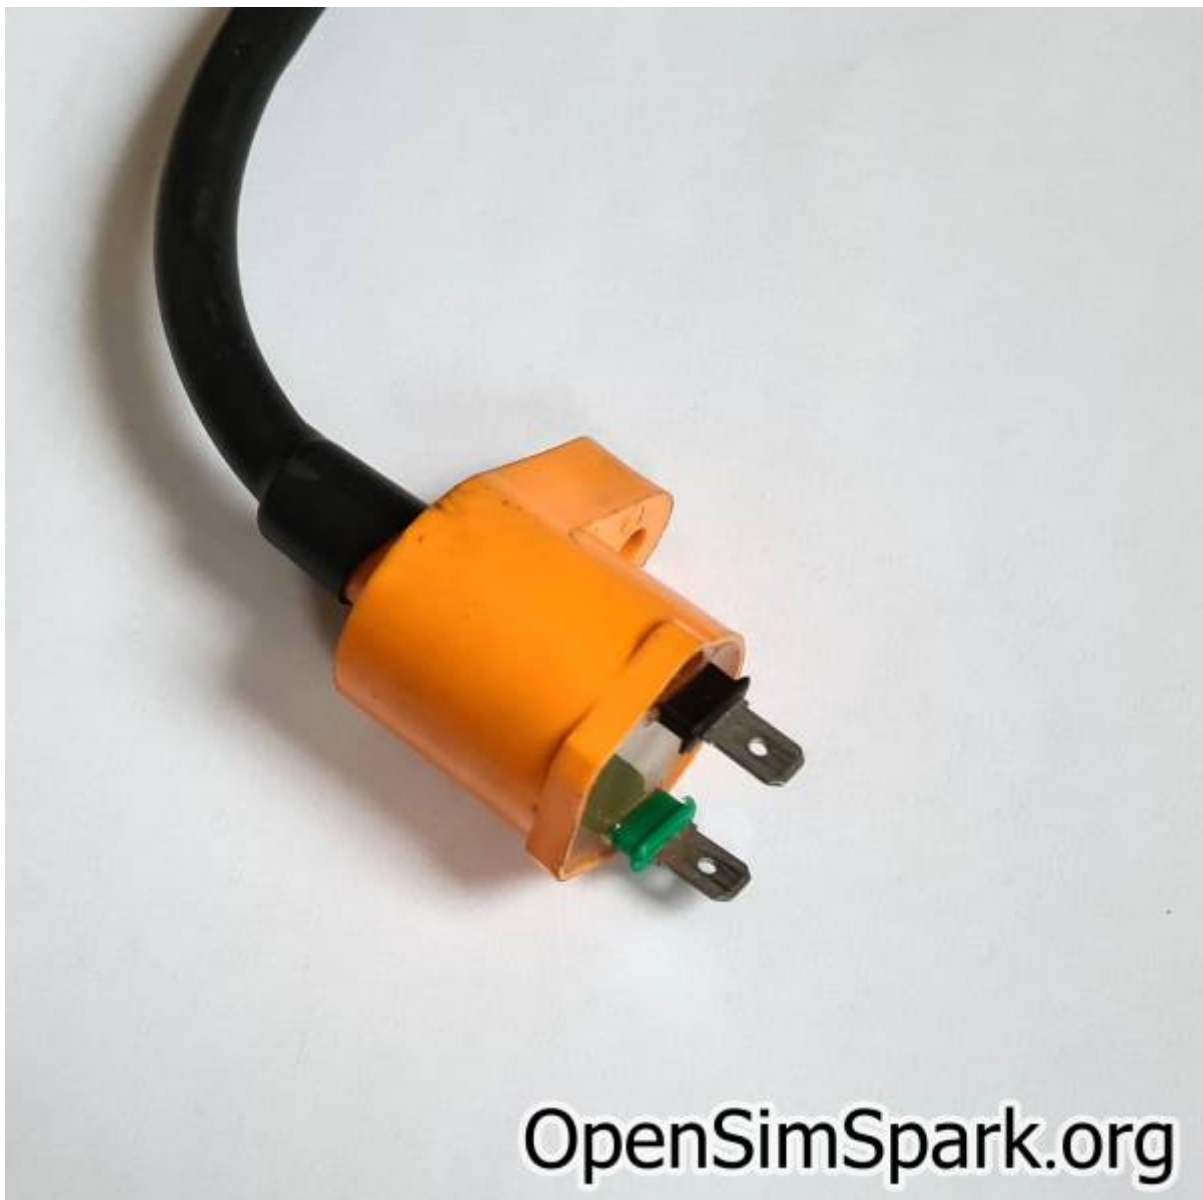

To get comparable results it is recommended to use some of the tested ignition coils.

## Naraku

Good experience with long durability was made with „Naraku Racing“ ignition coil. It costs around 15 € / 20 \$.

Measured values:

- Primary coil (green to black connector):  $R = 0,4 \text{ Ohm}$   $L = 0,033 \text{ mH}$
- Secondary coil (ignition cable to black connector):  $R = 3,3 \text{ kOhm}$   $L = 2,0 \text{ H}$
